

OUTDOOR POWER

E303CB- 13A PLUG TO 16A SOCKET ADAPTOR LEAD

Allows equipment fitted with a 16A plug to be connected to the domestic mains supply.

The E303CB should be used indoors as the 13A plug is not waterproof. Equipment connected to the 16A socket may be used outdoors, but may not be suitable for permanent or temporary immersion in water, or for use in damp locations such as in direct contact with wet grass.

All electrical equipment used outdoors must only be connected to the electricity supply through a Residual Current Device (RCD) rated at 30mA or less.

The maximum total load connected to the E303CB may not exceed 13 Amps, or 3000 Watts.

The E303CB may only be used on 230V supplies. 110 Volt equipment must be connected with plugs and sockets that are colour-coded yellow.

The E303CB should be checked annually for electrical safety by a qualified electrician.
