The test was carried out on a level tarmac surface.

The stand was extended to its maximum height, the locking pin was fitted, and the screws tightened. A loudspeaker bracket 180 mm × 120 mm with a top-hat fitting was fitted to the top of the stand. It was loaded evenly with 15 kg of test weights (being 150% of the rated load) and left under load for 10 minutes.

No damage nor distortion to any components was observed.
