1 x EH1478 Dehumidifier
1 x Power Cord
1 x User Manual

PARTS EXPLAINED
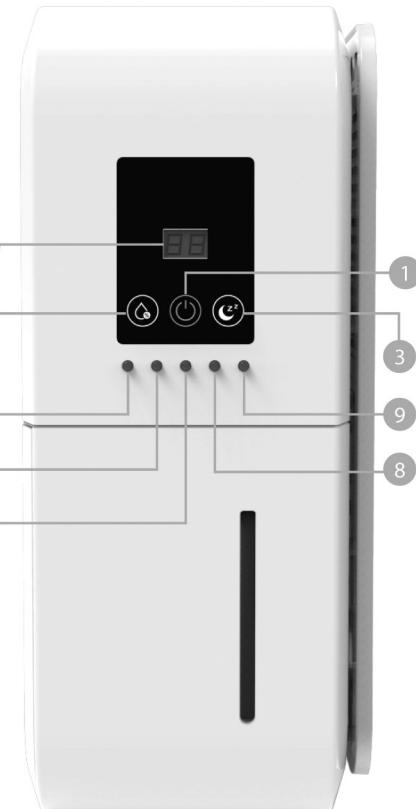

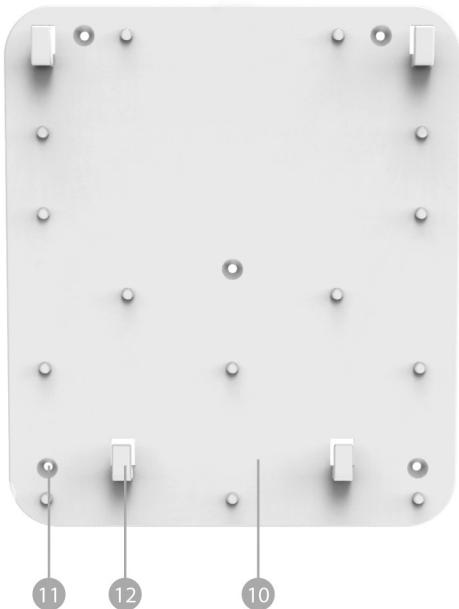

1. Power button
2. Humidity button
3. High and low speed buttons
4. Digital display
5. Work indicator
6. Water full indicator
7. High-speed indicator light
8. Low speed indicator
9. Humidity indicator
10. Hanging board
11. Screw Holes (5)
12. Mount points (4)
13. Air outlet
14. Air inlet
15. DC power socket
16. Removable water tank
17. DC Connector
18. AC to DC Power
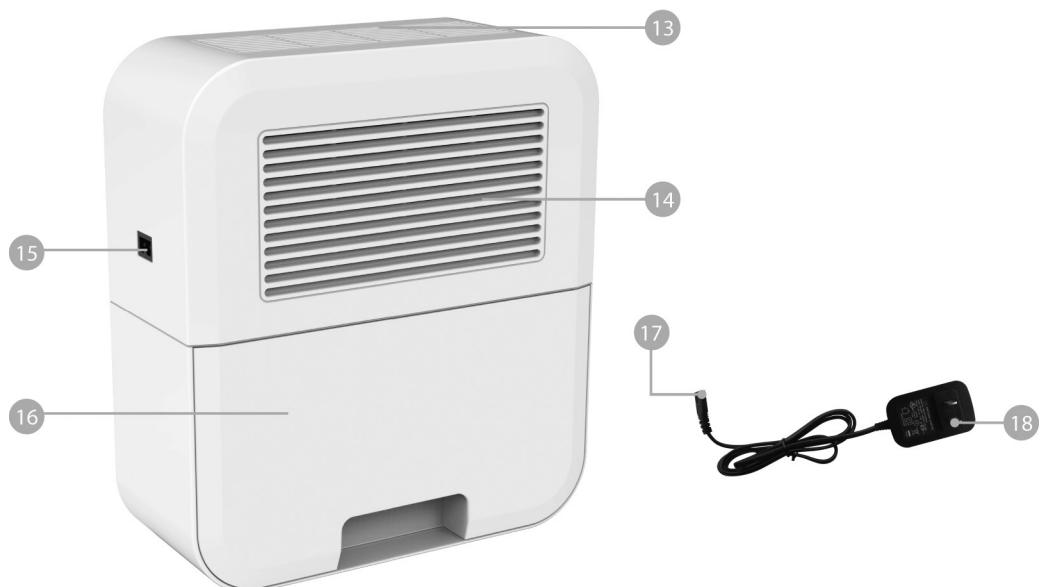

OPERATION

1. Connect the unit to the DC power supply and plug into a UK Mains socket. Briefly press the power button to enter the powered-on state, the fan rotates at high speed by default and the digital display shows the current environmental humidity value. The "ON" indicator, high-speed indicator, and humidity indicator (RH) light up in blue at the same time (see fig.1)

2. Press the humidity button to set the humidity value, each time you press this the humidity value adds 5%; when the set humidity value is greater than the ambient humidity level, the machine will stop dehumidification; press the shutdown button to maintain the last set humidity value.

3. The fan runs at high speed by default, and the high-speed indicator lights up in blue. Press the high-low speed button, the fan will run at low speed, and the low-speed indicator lights up in blue and the high-speed indicator light turns off (see fig.2)

4. When the water tank is full or drawn out, the "ON" indicator flashes, and the water full indicator lights up in red (see fig.3). Disconnect from the power. Carefully remove the full water tank and discard the contents down a sink or similar. Replace the tank and reconnect

5. Load the empty water tank into the machine body to resume normal opperation.
