

**EH5795**

Prem-I-Air 16" (40cm) White  
Oscillating Pedestal Fan  
with 3 Speed Settings

## **User Manual**

Please Retain for Future Reference

### **IMPORTANT**

#### **Installer and Users please note:**

These instructions should be read carefully and left with the user of the product for future reference.

The product and its mains lead should be inspected before use for signs of damage.

Do not use if there are any signs of damage, and consult your supplier for advice.

## BEFORE USE

You must inspect the appliance including its cable and plug for any signs of damage. If the product is damaged, DO NOT use it, and contact your supplier immediately.

## INTENDED USE

Designed to be used as a domestic fan

## PRODUCT SAFETY

- For indoor use only
- Only use this product on a flat stable surface
- Do not leave this product unattended when in use
- Leave at least 50cm gap around the product to allow for airflow
- Disconnect from the mains supply when not in use.
- Do not use in areas of high dust or particle concentration: Risk of explosion
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
- Children shall not play with the appliance.
- Cleaning and user maintenance shall not be made by children without supervision.
- Do not use in close proximity to gas appliances
- Do not use unless correctly installed.
- Do not cover when in use.
- Do not place the mains lead beneath a carpet or rug.
- Do not use the appliance in locations where paint, petrol or other flammable liquids are used or stored.
- Not suitable for use in boats, caravans or other similar areas.
- Do not insert any object into the appliance through the grilles. This may damage the appliance or result in overheating or electric shock.
- Do not use this appliance in the immediate surroundings of a bath, a shower or a swimming pool.
- The appliance is fitted with an overload cut-out which will operate if the motor overheats or is stalled. If this happens, disconnect from the mains supply immediately, and allow the motor to cool down.

## IDENTIFICATION OF PARTS

1. Front Grille
2. Fan Blade Nut
3. Fan Blade
4. Grille Mounting Nut
5. Rear Grille
6. Crank Shaft
7. Motor Housing
8. Oscillation Control Knob
9. Fan Body
10. Fixing Screw
11. Height Adjustable Pole
12. Pole Cover
13. Base Tube
14. Base
15. Base Cover

## ASSEMBLY

1. Insert the base tube (13) into the base (14) then insert the screws in the underside to secure
2. Slide the base cover (15) over the base tube (13) down to the base (14)
3. Slide the pole cover (12) over the height adjustable pole (11)
4. Slide the fan body (9) onto the height adjustable pole (11)
5. Slide the rear grille (5) over the crank shaft (6) and attach to the motor housing (7)
6. Secure the rear grille (5) by attaching the grille mounting nut (4) and turning tightly clockwise
7. Slide the fan blade (3) over the crank shaft (6) and secure with the fan blade nut (2), turning tightly **anti-clockwise**
8. Place the front grille (1) on the rear grille (5) and secure using the clips attached to the front grille (1)

## OPERATION

- Plug the mains lead into a 13 Amp mains socket.
- If connecting via an extension lead, make sure that the lead is rated at 3 Amps or more, and that it is fully unwound.
- Switch the appliance on at the mains socket.
- Use the push-button switches to the speed required. 0=OFF, 1=LOW SPEED, 2=MEDIUM SPEED, 3=HIGH SPEED
- Oscillation is selected by pressing the oscillation control knob (8) downwards and switched off by pulling it upwards
- To adjust the fan head angle switch off the unit and disconnect from the mains. Gently push the fan head forwards or backwards until the desired angle is achieved.
- It is normal for the motor to become warm in normal use.
- Unplug the appliance from the mains when not in use.

## OPERATING COSTS

At time of going to press, the average cost of electricity is £0.25 per unit (kilowatt-hour). The amount you are being charged will be shown on your electricity bill. At this cost, the EH5795 will cost 30p per day to run on the highest setting.

## PAT TESTING

When used in an office environment, this product must be safety-tested yearly by a qualified electrician (PAT Tested) in order to comply with the Electricity at Work Regulations.

We recommend that it is PAT tested regularly when used in a domestic environment.

## GENERAL SAFETY REQUIREMENTS

Domestic wiring must be tested periodically by a qualified electrician at least once every 10 years or at every change of occupancy.

For office and retail premises, and buildings such as village halls, the wiring must be inspected at least once every 5 years. It is recommended that all building be fitted with smoke alarms (it is mandatory for new buildings).

## MAINTENANCE

Before cleaning, turn the appliance off, and disconnect from the mains supply. The appliance may then be cleaned using a damp cloth with a drop of washing-up liquid to remove any dust or dirt from the grille and case. Do not use stronger detergents or solvents as these may damage the finish.

Using a dry 1" (25 mm) paint-brush, remove any dust from the grilles.

If the mains lead is damaged, it must be replaced by the manufacturer or an authorised service centre.

If the mains plug needs to be replaced, proceed as follows;

- Connect the brown wire to the terminal labelled "L".
- Connect the blue wire to the terminal labelled "N".
- Make sure that the cord-grip is positioned correctly (over the outer sheath of the cable) and it is fully tightened.

## DISPOSAL AND RECYCLING

You must not dispose of this appliance with domestic household waste.

Most local authorities have specific collection system for appliances and disposal is free of charge to the end-user.

When replacing an existing appliance with a similar new appliance your retailer may take the old appliance for disposal.
